Rautomead Casting Technology in Barcelona

Release Date:

Continuous casting technology specialists, Rautomead Limited, of Dundee, Scotland, have delivered, installed & commissioned a model RS 3000/5 upward vertical copper rod casting machine at La Farga Lacambra, Barcelona.

With a unique 200-year history, La Farga Lacambra is one of Spain's leading copper processing companies and can trace its origins back to bell-founding and cannon manufacture.

La Farga Lacambra is also a leading technology company, which has developed its own process for making fire-refined copper rod directly from scrap.

The new Rautomead casting machine is being used for production of copper & copper alloy rods. Successful casting trials carried out recently at Rautomead's Scottish-based technology centre were a key factor in securing this significant new order.
